DR. MUSHTAQ'S · CERTIFICATE OF ANALYSIS · SPECIMEN

What a lot certificate will show

Layout and fields only. Every result is blank until an independent laboratory issues lot one. This page is not a test result.

PRODUCT	**LOT NUMBER**	**PRESSED**	**BEST BY**
Blackseed Oil, cold-pressed Nigella sativa	Pending; on the bottle	Pending	Pending
LABORATORY	**REPORT NUMBER**	**SIGNED BY**	**ISSUED**
Independent, ISO/IEC 17025-accredited	Pending	Pending	Pending

PANEL	METHOD	UNIT	RESULT
Thymoquinone	HPLC or GC, reference standard	% w/w	*pending*
Fatty-acid profile	GC-FID of methyl esters	% of total	*pending*
Linoleic acid (C18:2)		%	*pending*
Oleic acid (C18:1)		%	*pending*
Palmitic acid (C16:0)		%	*pending*
Stearic acid (C18:0)		%	*pending*
Peroxide value	AOCS Cd 8b-90 or equivalent	meq O2/kg	*pending*
Free fatty acids	AOCS Ca 5a-40 or equivalent	% as oleic	*pending*
Lead	ICP-MS	mg/kg	*pending*
Arsenic	ICP-MS	mg/kg	*pending*
Cadmium	ICP-MS	mg/kg	*pending*
Mercury	ICP-MS	mg/kg	*pending*
Total aerobic plate count	USP <2021> or equivalent	CFU/g	*pending*
Yeast and mold	USP <2021> or equivalent	CFU/g	*pending*
E. coli	USP <2022> or equivalent	per 10 g	*pending*
Salmonella	USP <2022> or equivalent	per 25 g	*pending*
Staphylococcus aureus	USP <2022> or equivalent	per 10 g	*pending*

SPECIMEN · NOT A REAL LOT · NO RESULTS

HOW TO READ THIS CERTIFICATE

Thymoquinone is reported as a percentage of the oil by weight. It varies by harvest and press, which is why the number belongs to a lot, not to a brand.

The fatty-acid profile is a fingerprint of the seed and a check that nothing was blended in. Peroxide value measures freshness; lower is fresher.

Heavy metals are reported against the laboratory's detection limits. The microbial screen is reported as counts, or as absent in the stated sample size.

The issued certificate carries the laboratory's name, accreditation, report number, and signature, and is published at drmushtaqs.com/coa before the lot ships.
